CITRIX

What is Citrix?

Citrix is a platform that provides secure access to applications and desktops from any location as long as they are connected to the Internet.

How is Citrix used at Douglas College?

Many licensed software applications that students need to use for their courses are only available via Citrix in the student computer labs on campus. With Citrix, students are able to use these applications from their homes as well.

Do all students at Douglas College have access to Citrix?

No. Due to limited availability of licenses, the college has restricted access to Citrix. Only students who are attending classes that require the use of software that is only available on Citrix will be given access to it.

Douglas College: Standard Lab Image Software

Current list of Lab Software (PDF)
